BILLING PROCEDURES

- One of the bills you will receive will be addressed from Mercer County Surgery Center. This is a result of the facility fee and takes the place of the outpatient hospital bill. The facility is New Jersey State Licensed and Certified by Medicare as an Ambulatory Surgery Center. Your insurance company will be billed separately for these charges. However, during this period, you may receive statements. Please make arrangements to pay the portion that is not covered by your insurance company as soon as you receive the first statement. Once your insurance company has paid, it will be reflected on your next statement.
- One of the bills you will receive will be addressed from your Physician's office. This bill is a result of the professional services provided to you. This is the fee the doctor has charged you for doing the procedure. The doctor's office will bill your insurance company for the charges.
- If this procedure requires anesthesia one of the bills you will receive will be addressed from Hamilton Anesthesia P.C. or Delaware Valley Anesthesia. This is the fee the Anesthesiologist has charged you for providing sedation and/or analgesics. The Anesthesiologist's office will bill your insurance company for these charges.
- If this procedure requires pathology or laboratory examinations, tests or screening to be performed, one of the bills you will receive will be addressed from the Pathologist or Laboratory. This is the fee the Pathologist or Laboratory has charged you for providing results from such examinations, tests or screening. The Pathologist or Laboratory will bill your insurance company for these charges.

Our normal business hours are 7.00 am to 5.00 pm Monday to Friday. If you have any questions, please contact our office.

Thank you for choosing Mercer County Surgery Center
